Halloween Night

Boo! What the heck! Don't do that again! I'm trying to put my makeup on for my costume! You should start putting costume on too Kayla. But I don't want to. Well you have to because tonight is trick or treat night. I still don't want to. Well I guess you don't want candy. Candy! You never told me I would get candy!

Ok I'm ready to get candy Catherine! Kayla it's only 5:30 we have at least another hour or so. But I want to! Well you're not going to get to for another hour or so. Catherine can we tell scary stories? Please? Oh alright but don't get scared though. The story is called Halloween Night.

The night was October 31st, two girls are trick or treating. Then a clown came up and handed them a lollypop. The end. That wasn't scary Catherine. I know, I know, I just don't want you to have nightmares Kayla. I will not, have a nightmare Catherine! Okay the real story of Halloween Night.

It was October 31st everyone was dressed up to trick or treat. As it got darker more kids started trick or treating. Lots of houses ran out of candy. Out of nowhere everyone heard evil laughing and it was everywhere. Down the alleyways, in the streets and in people's minds.

Everyone's eyes were glowing red like laser beams. Everyone except two girls. Their names were Cathleen and Kaylie. They didn't know what was happening at that time but they knew something was wrong. Terribly wrong.

They trick or treated normally but every house they went to everyone's eyes were glowing, but they weren't blinking. Just starring. Cathleen had remembered her field trip to a

science lab last year. In the lab there was a giant capsule full of a new disease. The disease was called the laughing gas disease.

Halloween night will be continued. Catherine I'm afraid to go outside, and go to the dentist. Kayla it was just a story, and why are you scared to go to the dentist? I'm scared to go to the dentist because they have laughing gas.
